Afterschool Tracker
AFTERSCHOOL PROGRAM MANAGEMENT

PRODUCT DEMO · FOR PROGRAM DIRECTORS

Run your whole afterschool program from one dashboard.

Seasons, enrollment, sign-in/out, attendance billing, and month-end accounting. One streamlined workflow that gives time back to your staff, costs parents less, and feels effortless to everyone who touches it.

- ✓ **Set up a season in minutes**
- ✓ **Cheaper for parents via bank pay**
- ✓ **Know exactly who’s on campus**

FERPA-aligned. A hardened, security-first platform built on best-in-class tools.

WHY DIRECTORS SWITCH

Three promises, on every screen.

01

Time back to schools

Copy a whole season forward, auto-generate sessions, let billing run itself. Your team stops living in spreadsheets and gets their afternoons back.

02

Better for parents

Transparent all-in pricing, one login for every child, and a bank-pay discount that makes enrichment genuinely cheaper than the competition.

03

Safety & accountability

Every child signed in and out with a timestamp, plus a live “who’s on campus” roster and audit-ready books. FERPA-aligned, security-first, and built on hardened, best-in-class platforms.

We’ll walk the product by wearing the six hats your program wears every day.

01

HAT 1 OF 6

The Program Manager

Task: stand up the new Fall season

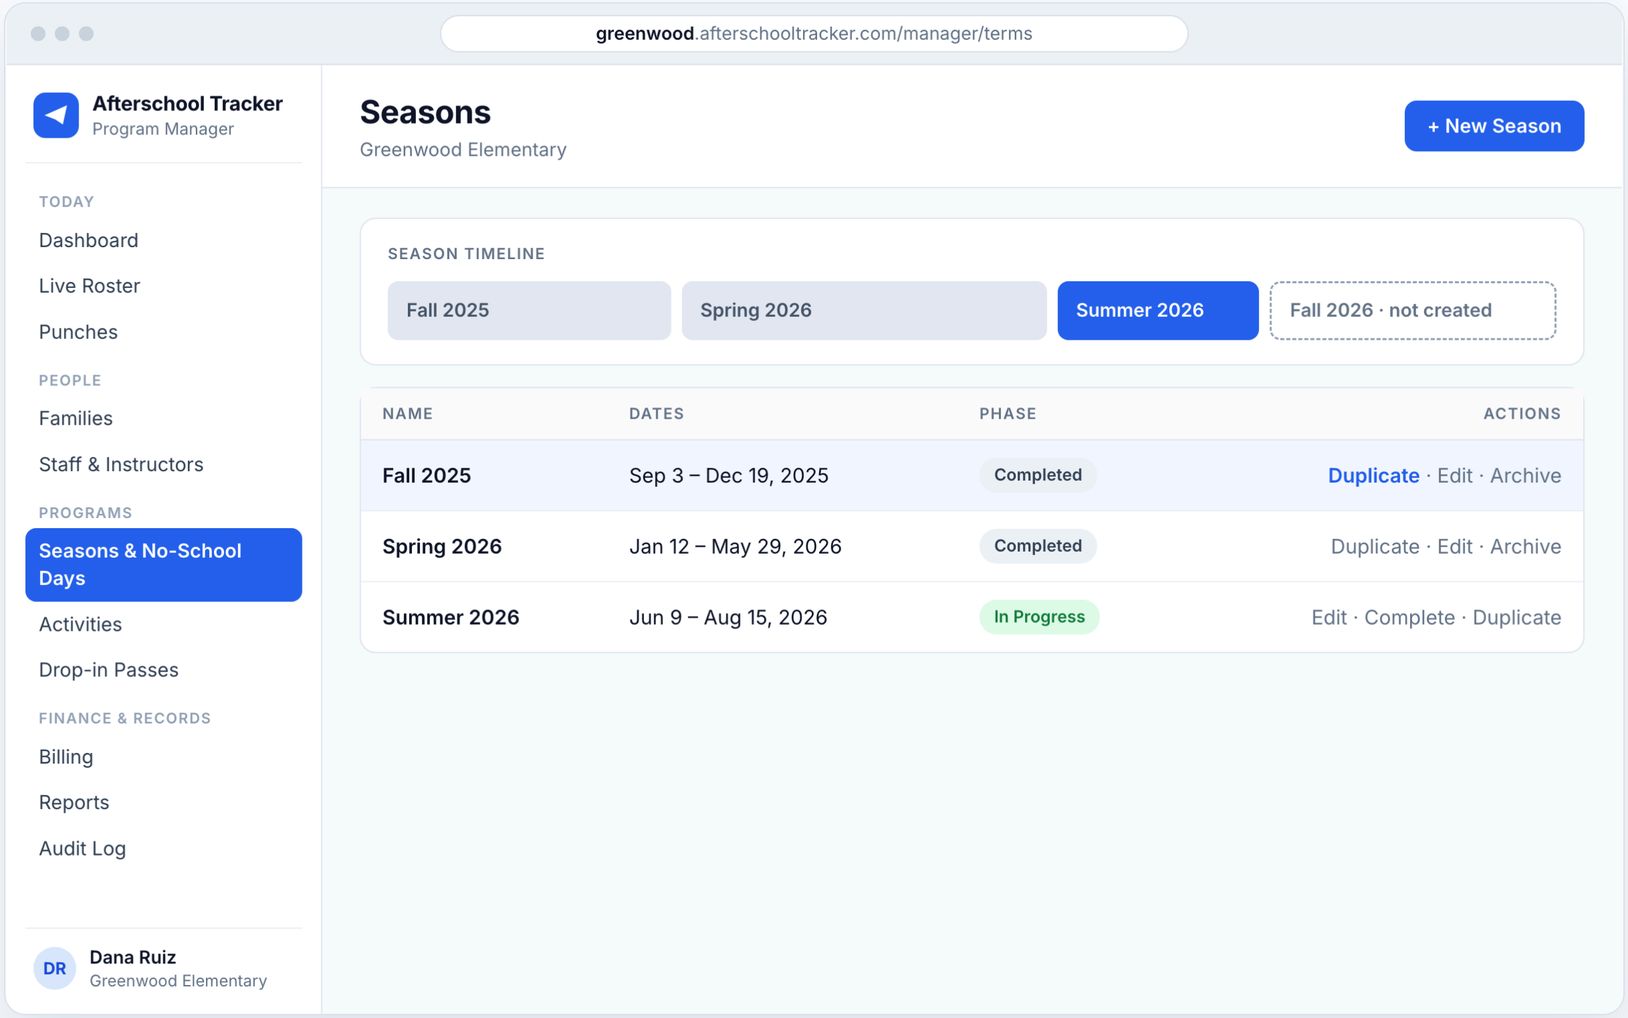
1. Open the Seasons timeline and find last year’s Fall season
2. Duplicate it: activities, instructors, fees and schedules copy forward
3. Adjust the copied activities for this year’s rates and availability
4. Publish; registration windows open on the dates you set

Time back: what used to be a week of rebuilding spreadsheets becomes a few minutes of edits.

MANAGER · 1 OF 3

Find last year’s season

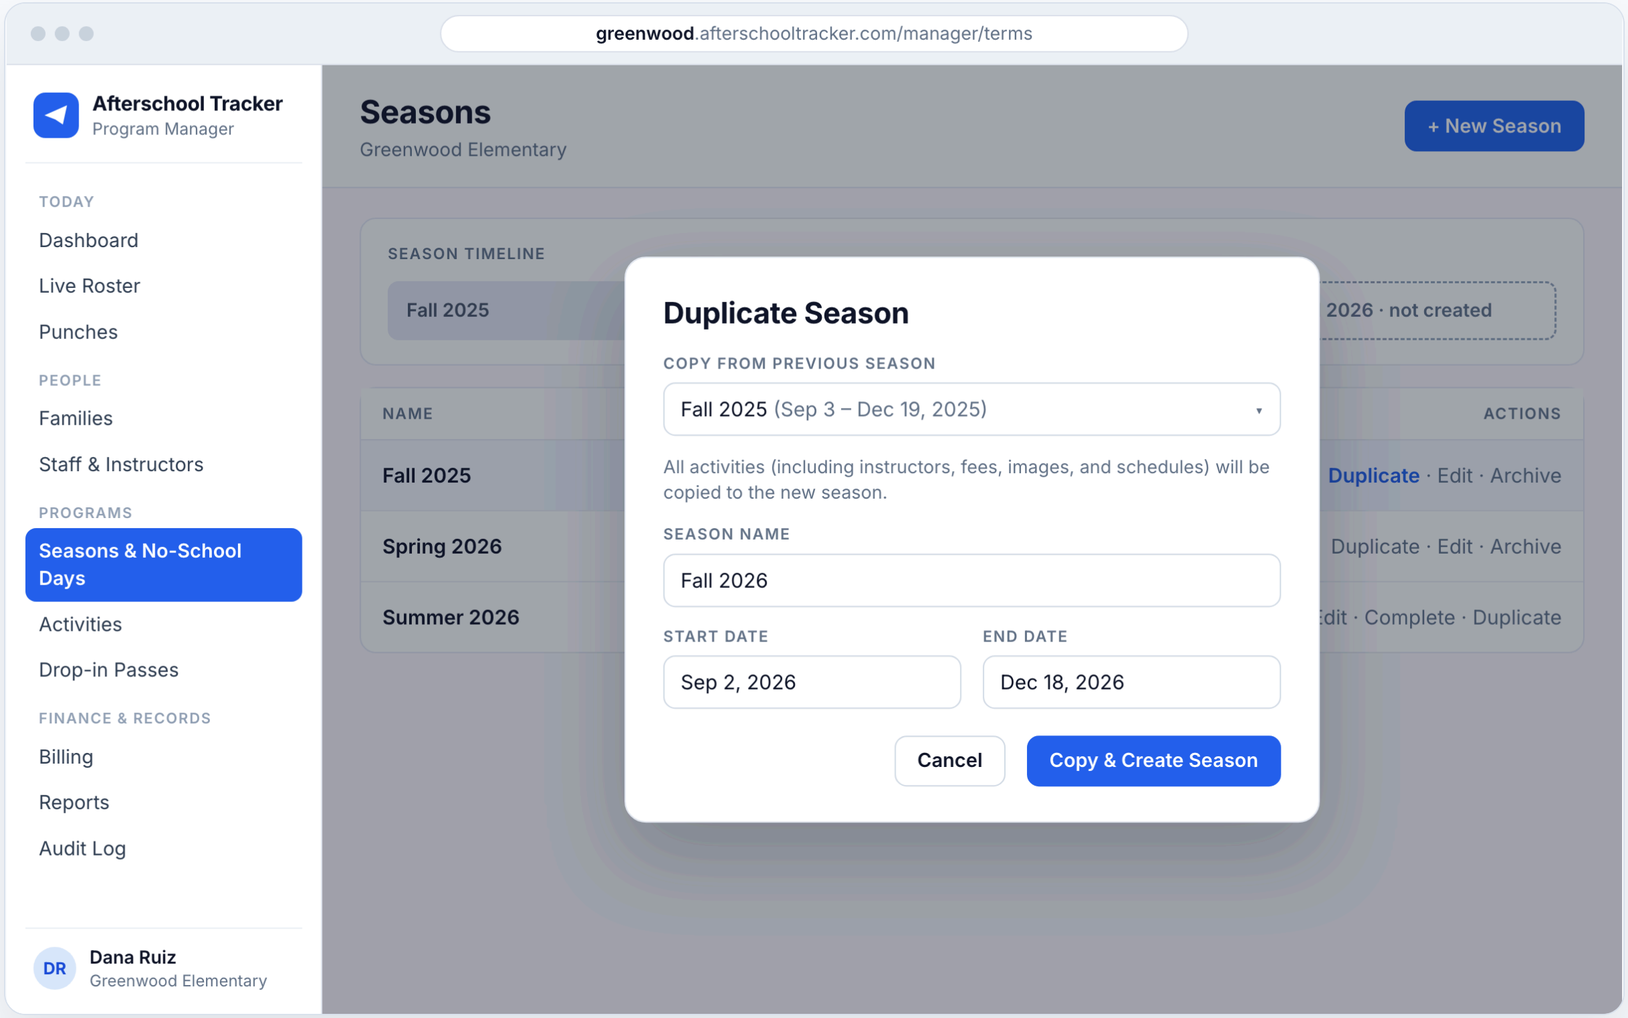
Last year’s Fall 2025 holds 12 activities. One click on Duplicate carries them all into Fall 2026, no re-typing.



MANAGER · 2 OF 3

Duplicate in one click

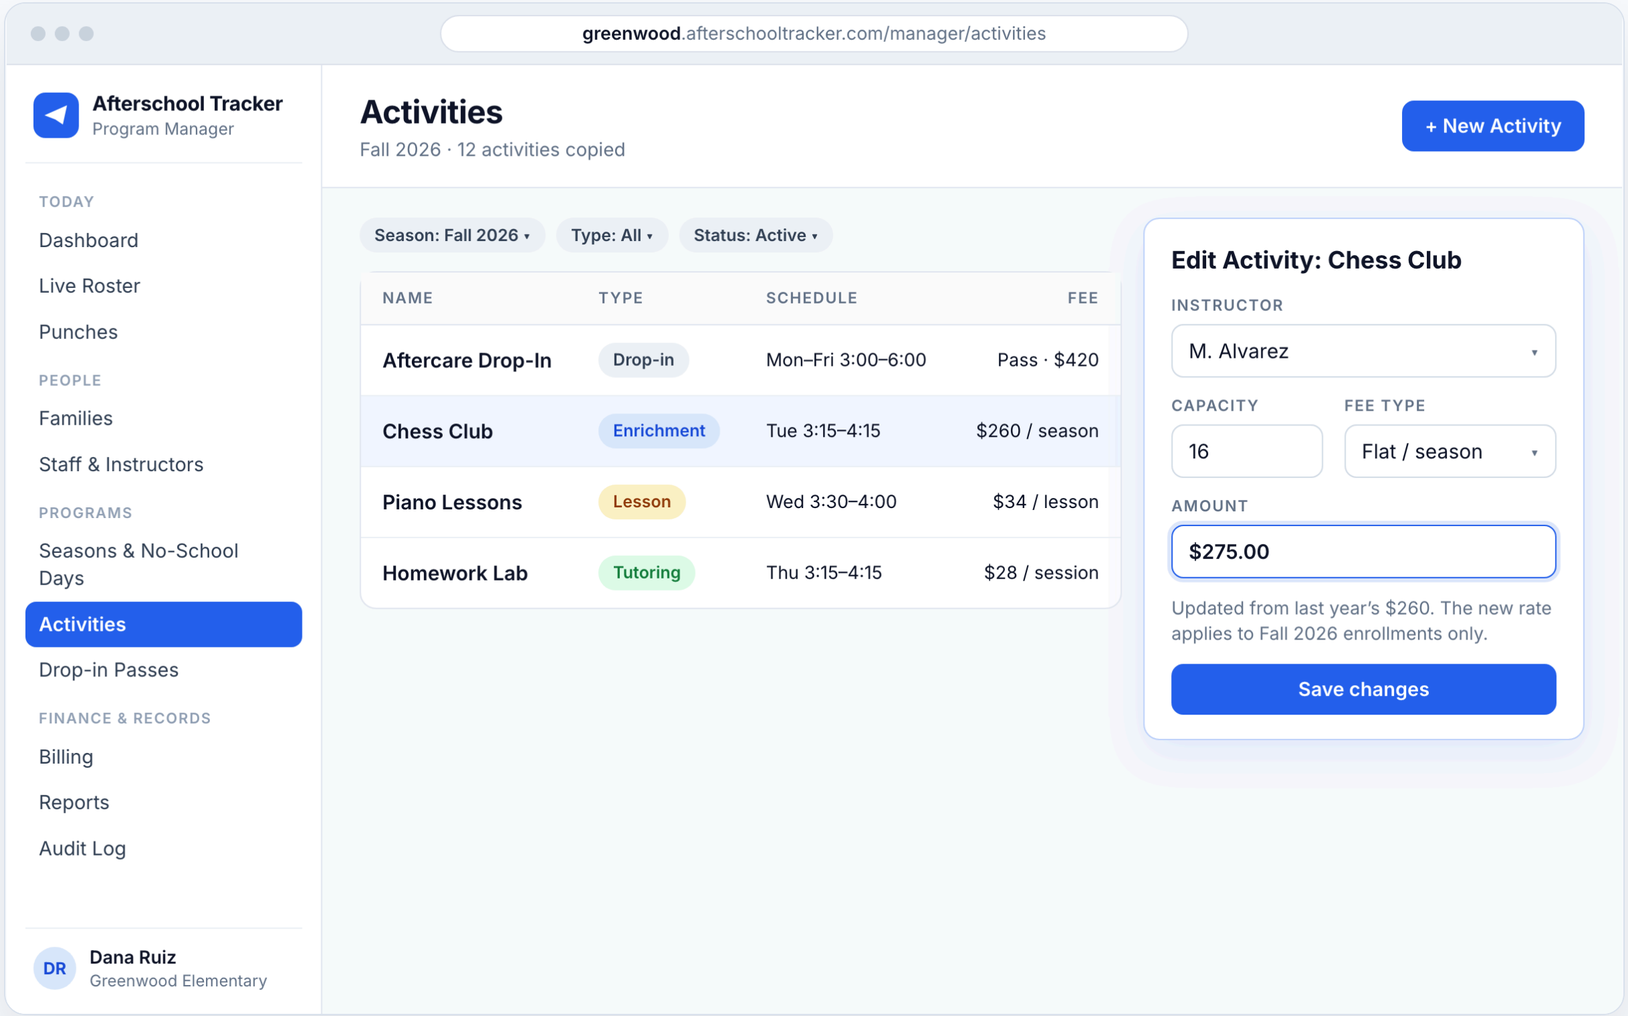
Season name and dates auto-fill. Registration windows are optional. Set them once and the catalog opens itself.



MANAGER · 3 OF 3

Adjust what changed

Update the rate and re-confirm the instructor, the only real work. Everything else copied forward untouched.



02

HAT 2 OF 6

The Parent

Task: enroll two children in one sitting

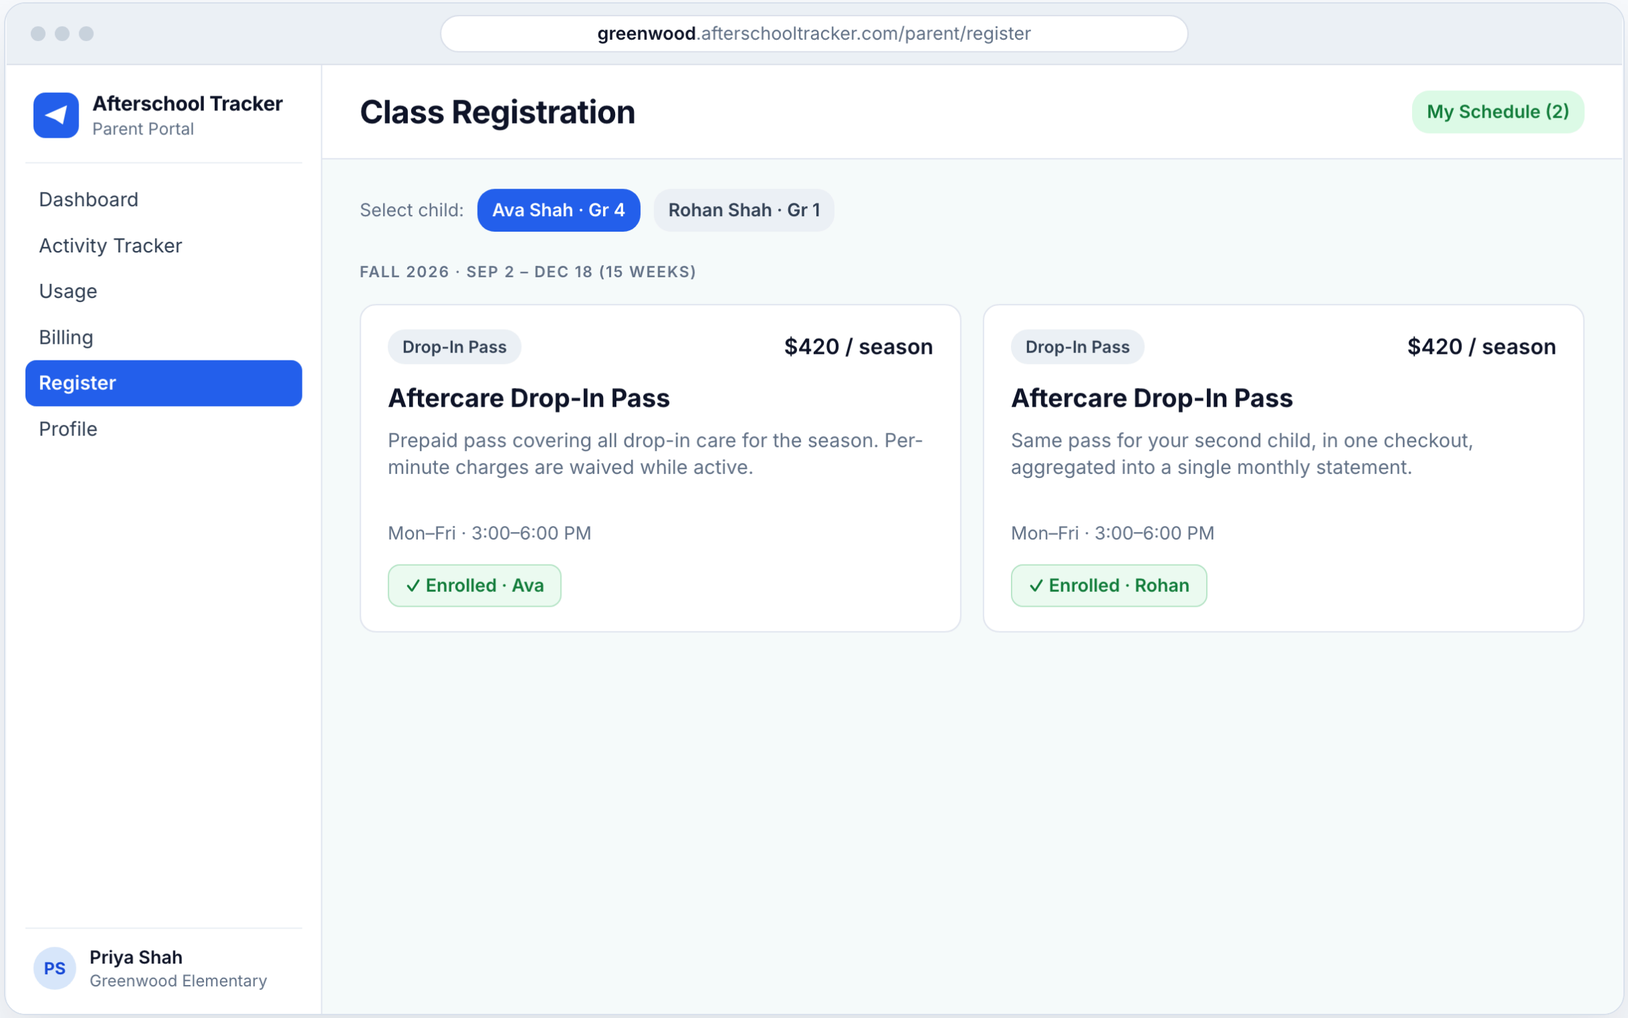
1. Annual drop-in pass for both kids
2. Enrichment (Chess Club) for the older child
3. Music lessons (Piano) for the younger child
4. Save a bank account once, and every future charge is cheaper

Better for parents: one login, transparent all-in prices, and a bank-pay discount that beats card-only competitors.

PARENT · 1 OF 3

Both kids, one checkout

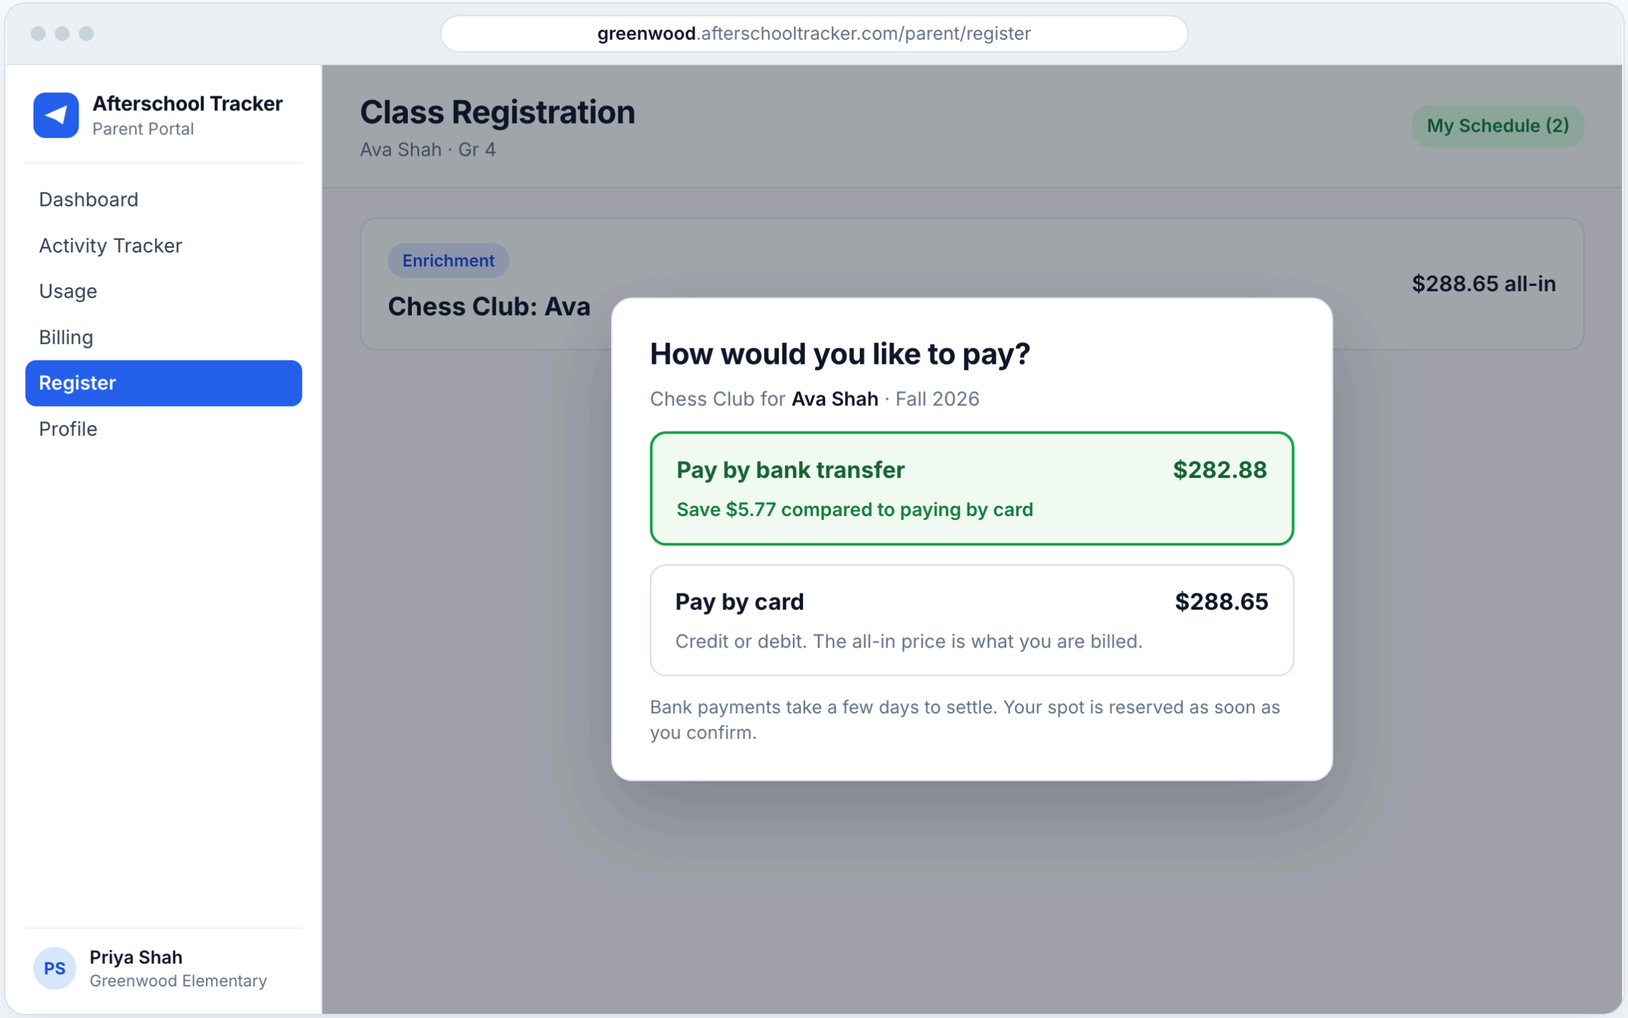
Both kids covered for all drop-in care. Sessions are still tracked for safety, but billing is one predictable monthly charge.



PARENT · 2 OF 3

All-in prices, with a bank discount

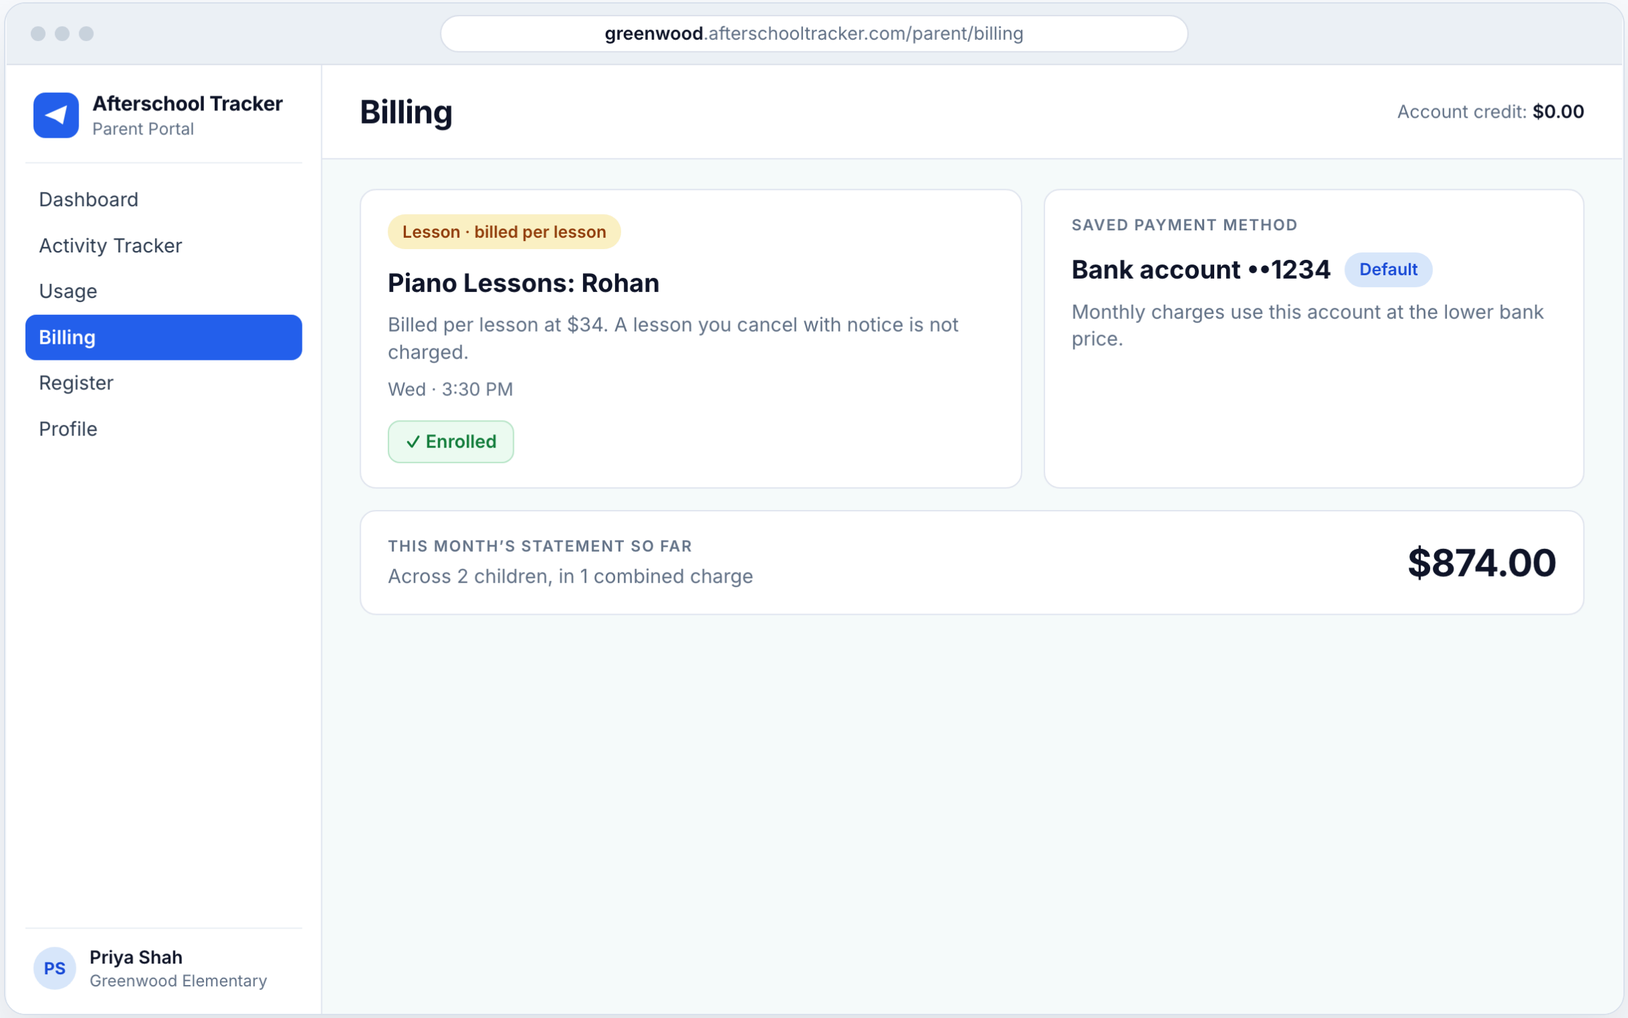
Prices are shown all-in, so the price displayed is the price billed (California SB 478). The lower bank price is framed as a discount, never a card surcharge.



PARENT · 3 OF 3

One saved bank account

Two kids, three programs, one saved bank account. Drop-in aggregates monthly; lessons bill per lesson, and an excused absence is free.



03

HAT 3 OF 6

The Afterschool Staff

Task: run a safe, calm dismissal

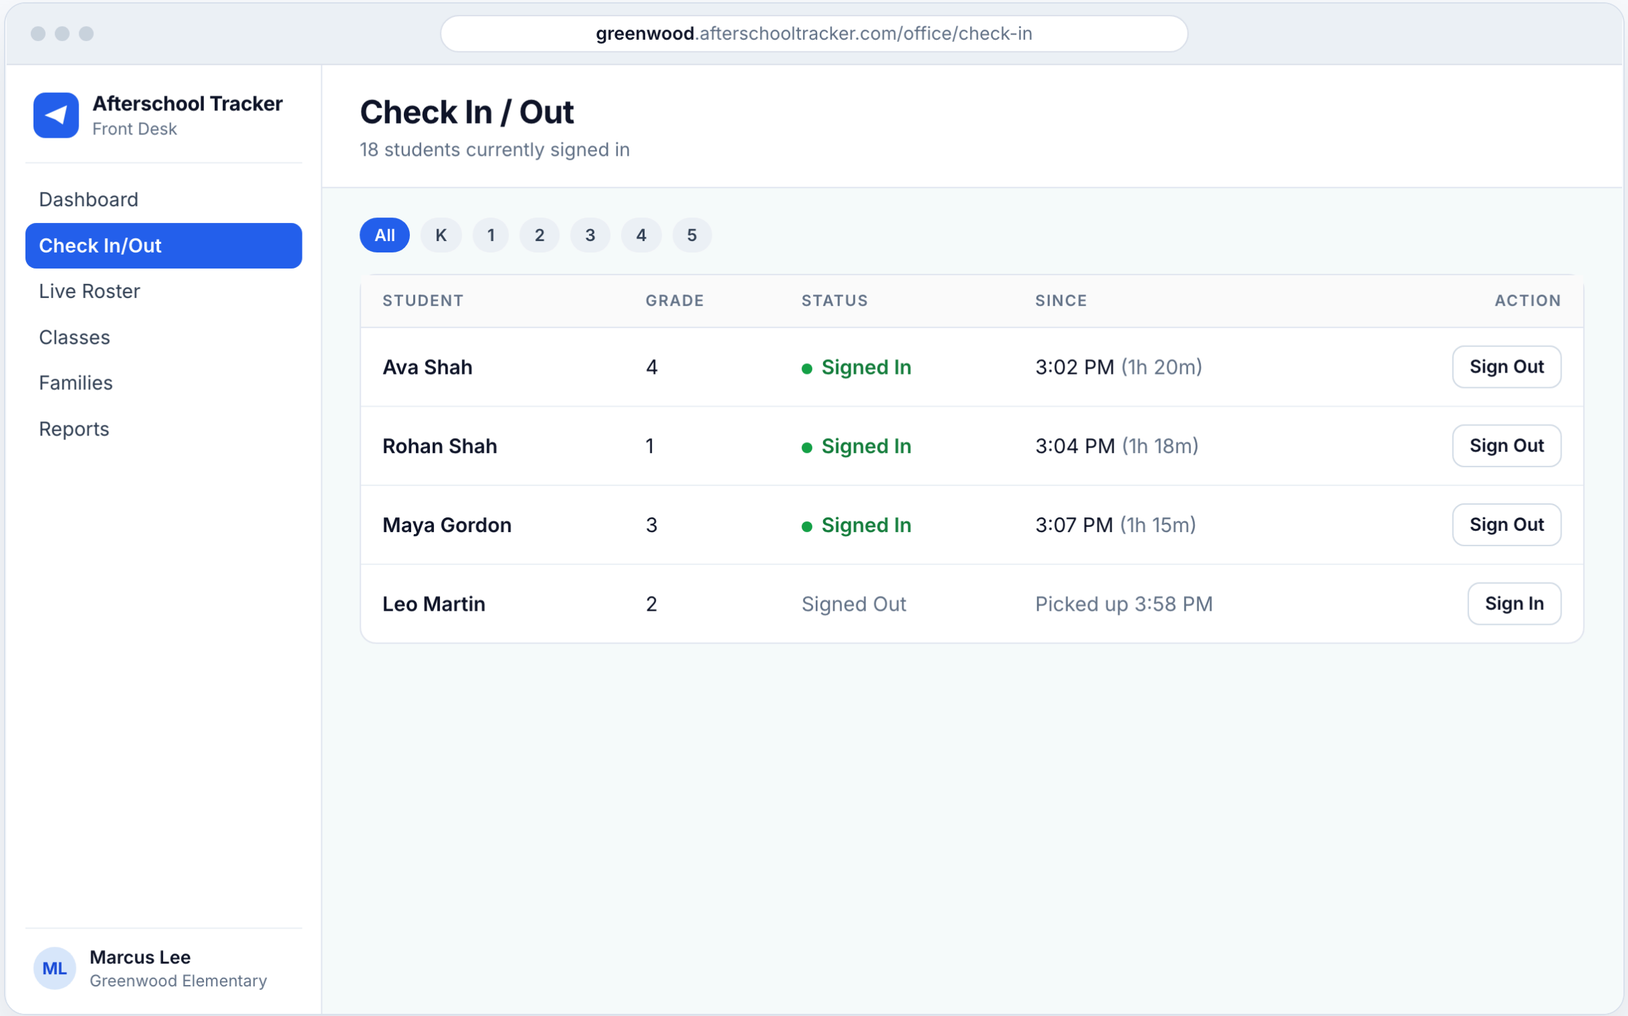
1. Review who’s signed in and for how long
2. See a live “who’s on campus” roster update in real time
3. Look up a family and contact a parent if needed
4. Keep an eye on the self check-in kiosk from the front desk

Safety and accountability: every child accounted for, every action timestamped to a named staff member.

FRONT DESK · 1 OF 2

Accountable sign-out

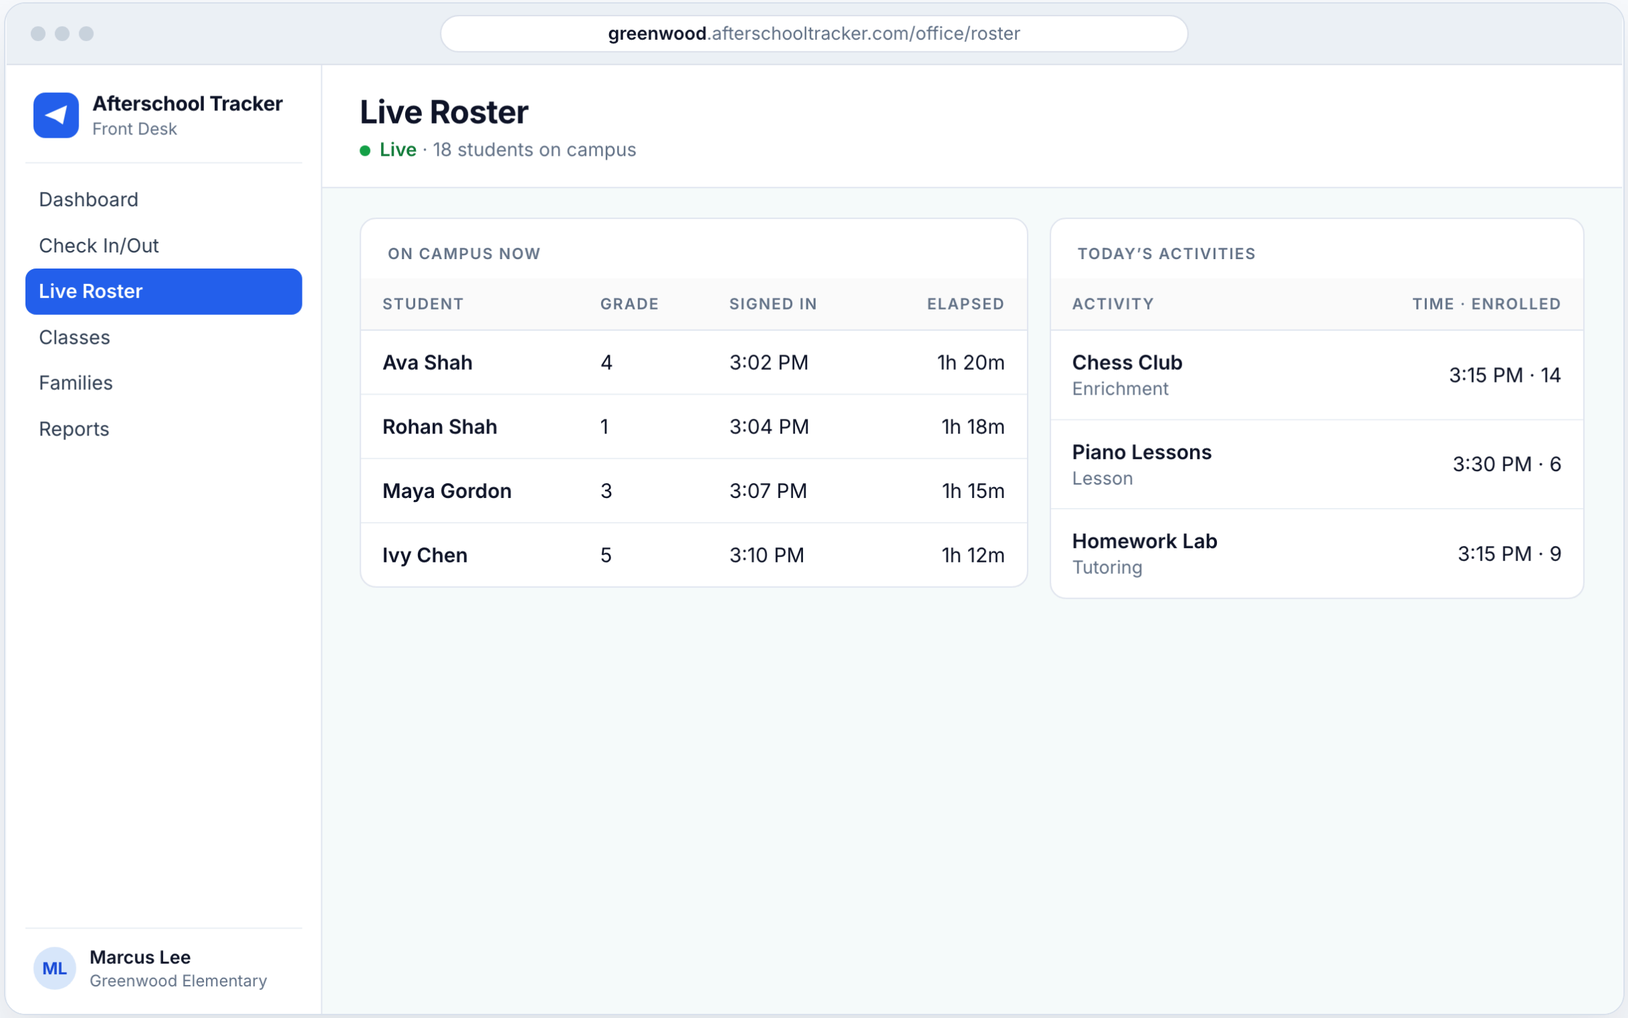
Staff-authenticated sign-out records who released each child, not just a name tap. Full accountability at pickup.



FRONT DESK · 2 OF 2

Who’s on campus, live

The roster updates the instant a child taps the kiosk. At any moment the front desk knows exactly who is here, and where they should be.



04

HAT 4 OF 6

The Student

Task: check in and find their afternoon

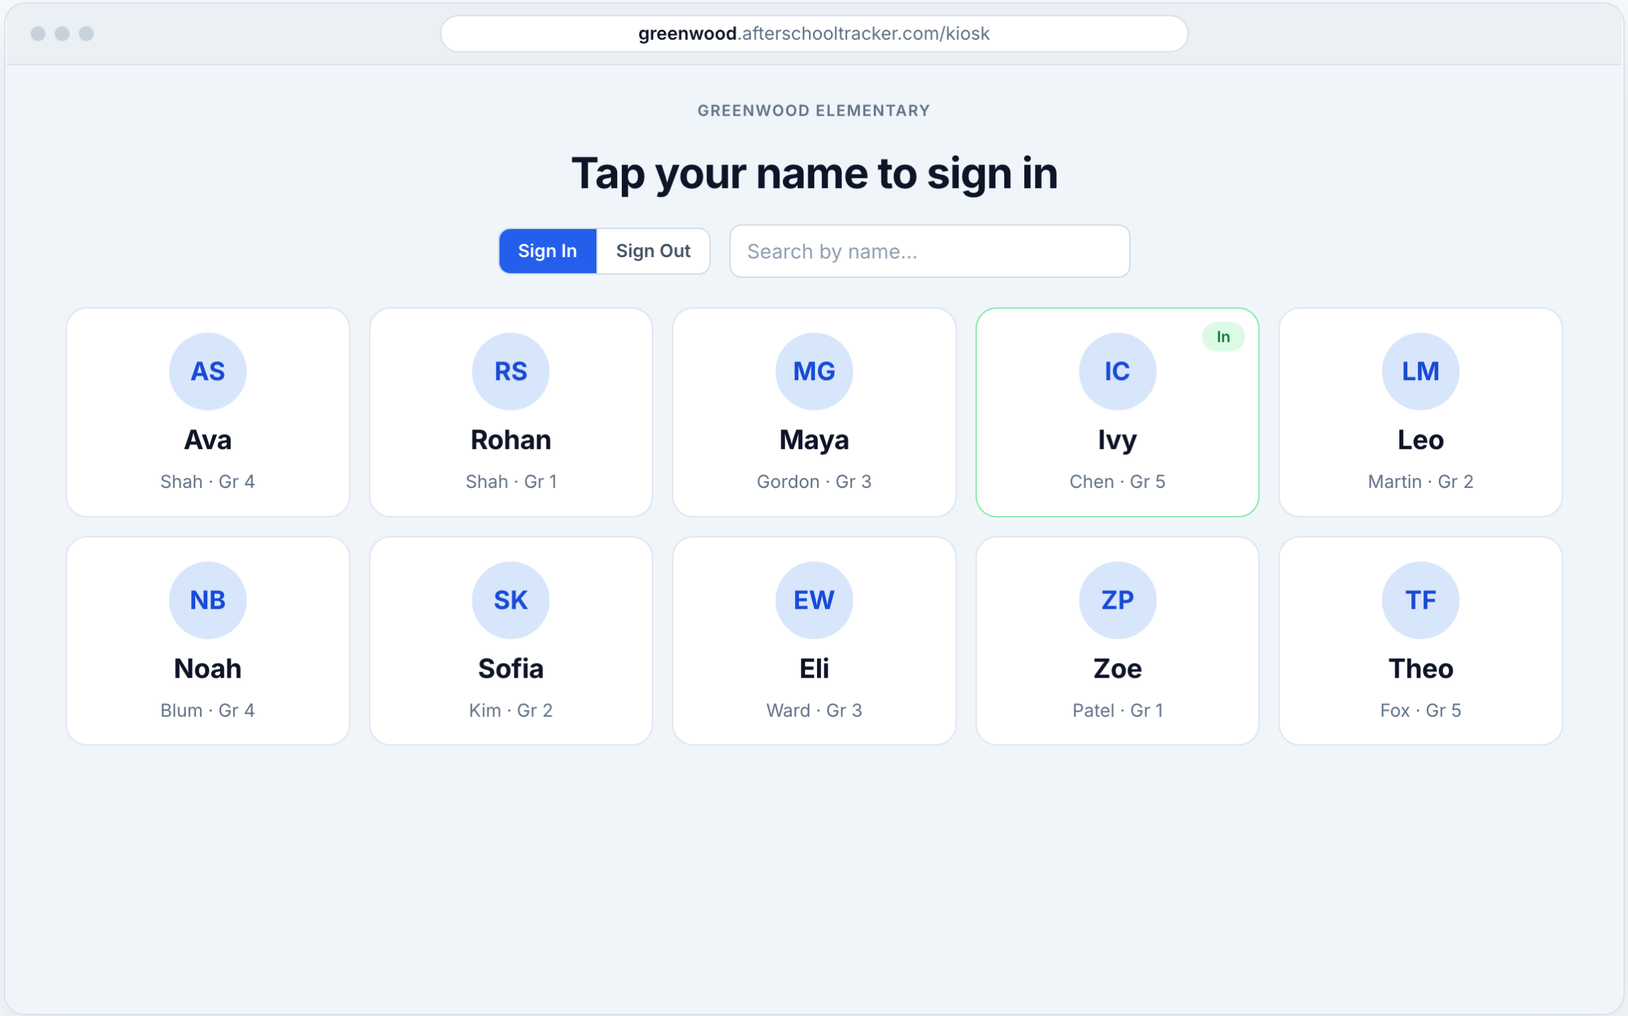
1. Walk up to the self check-in kiosk in the lobby
2. Tap their own name on a big, friendly tile, no passwords
3. Confirm (siblings grouped together automatically)
4. See today’s enrichment and music lessons right on screen

Effortless and safe: a five-year-old can sign in unaided, and the roster updates instantly for staff.

STUDENT · 1 OF 2

Tap your name

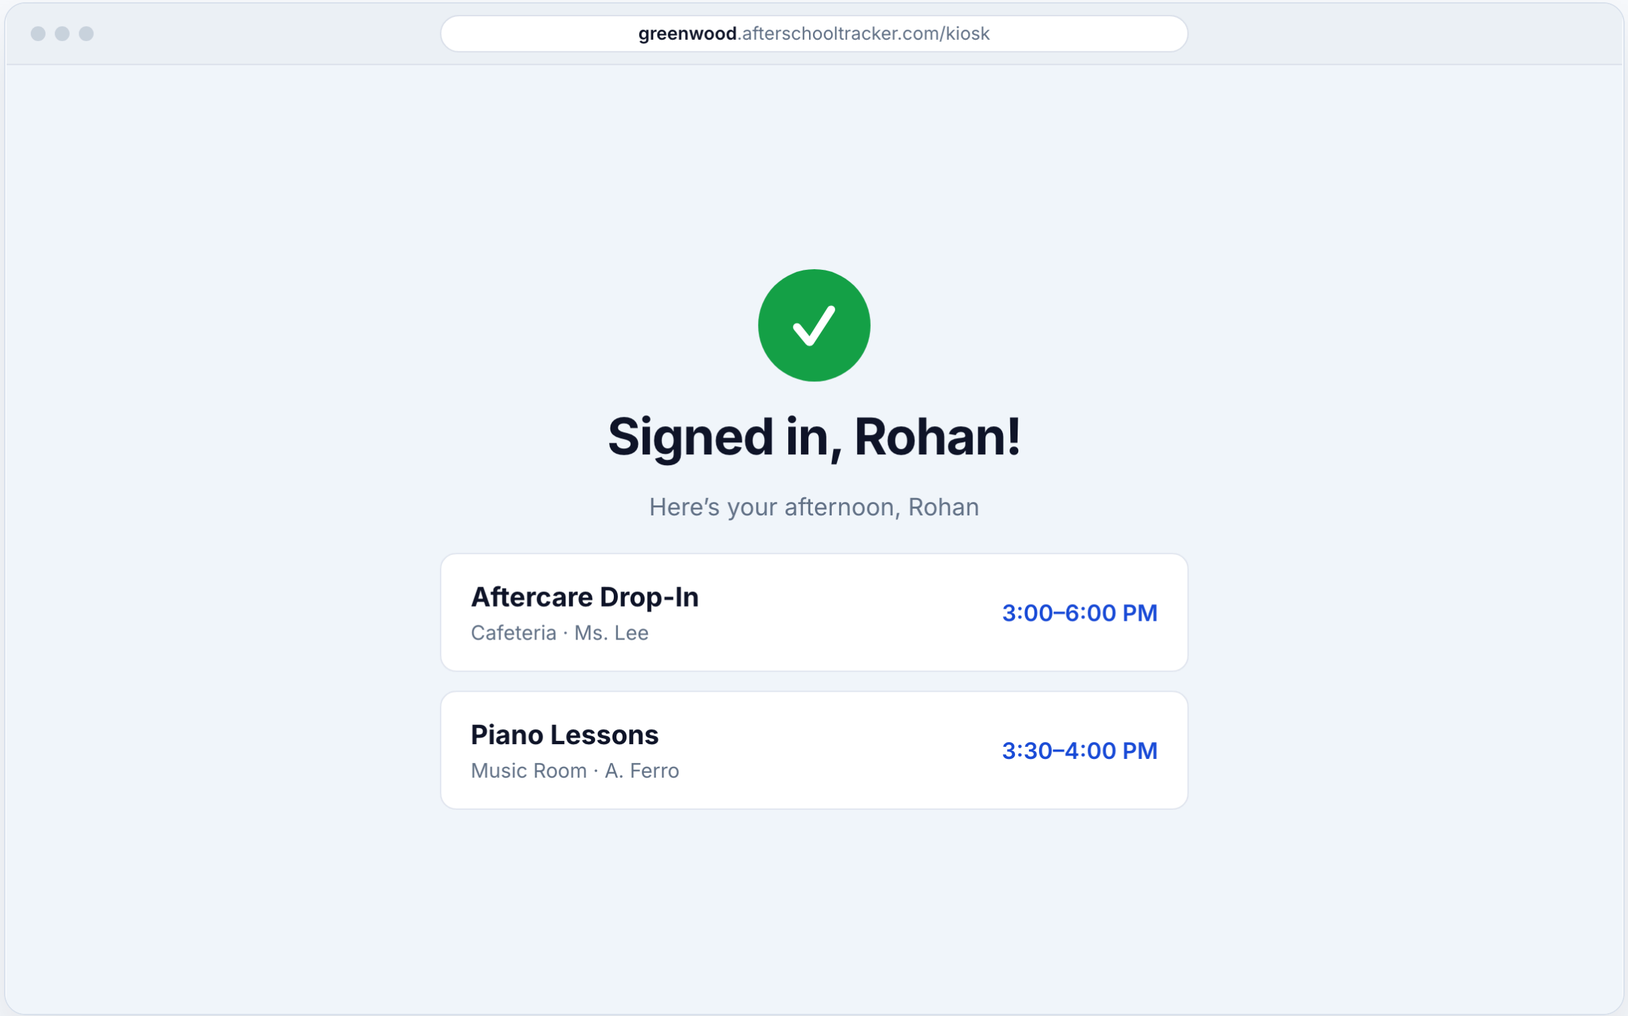
No logins, no PINs for the kids, just a tap. Siblings like Rohan and Ava can be signed in together on the confirm screen.



STUDENT · 2 OF 2

Here’s your afternoon

The child instantly sees where to go next, to their enrichment or music lesson, and staff see them appear on the live roster.



05

HAT 5 OF 6

The Music Instructor

Task: teach, mark, done

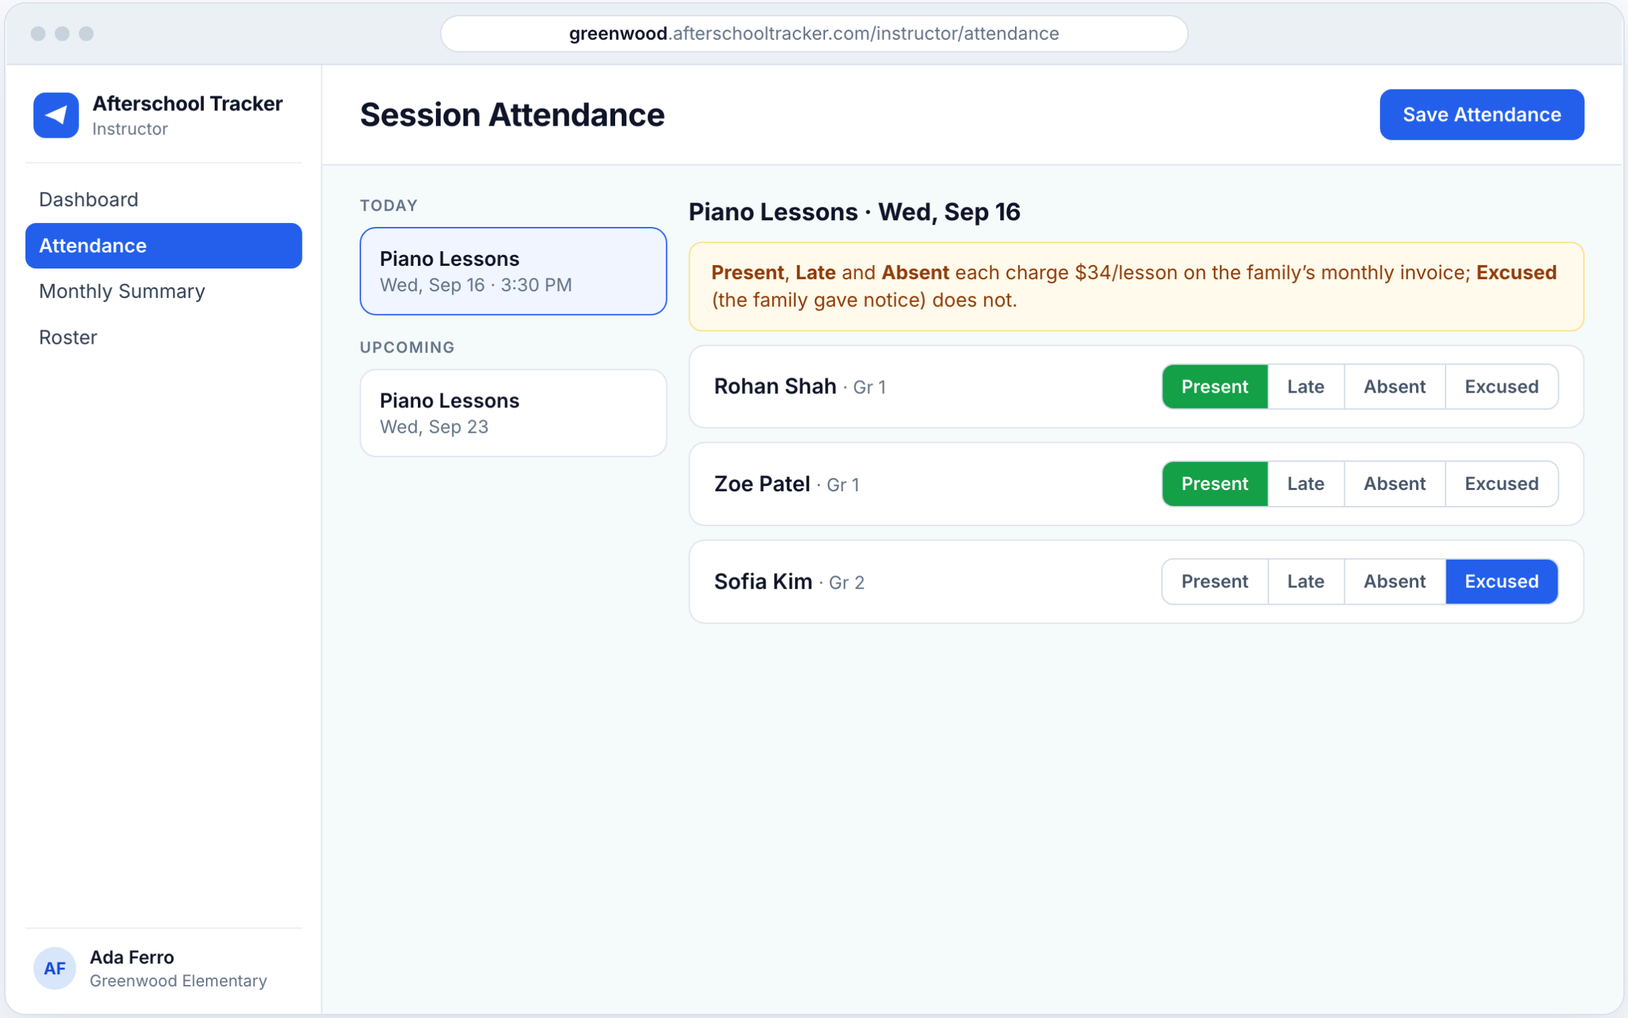
1. Open today’s Piano Lessons session
2. Mark each student Present, Late, Absent or Excused
3. A clear banner shows exactly what each mark will charge
4. That night, the marked lessons are invoiced to each family automatically

Time back: instructors just teach and tap. Billing runs itself overnight, with no invoices and no chasing.

INSTRUCTOR · 1 OF 2

Attendance drives billing

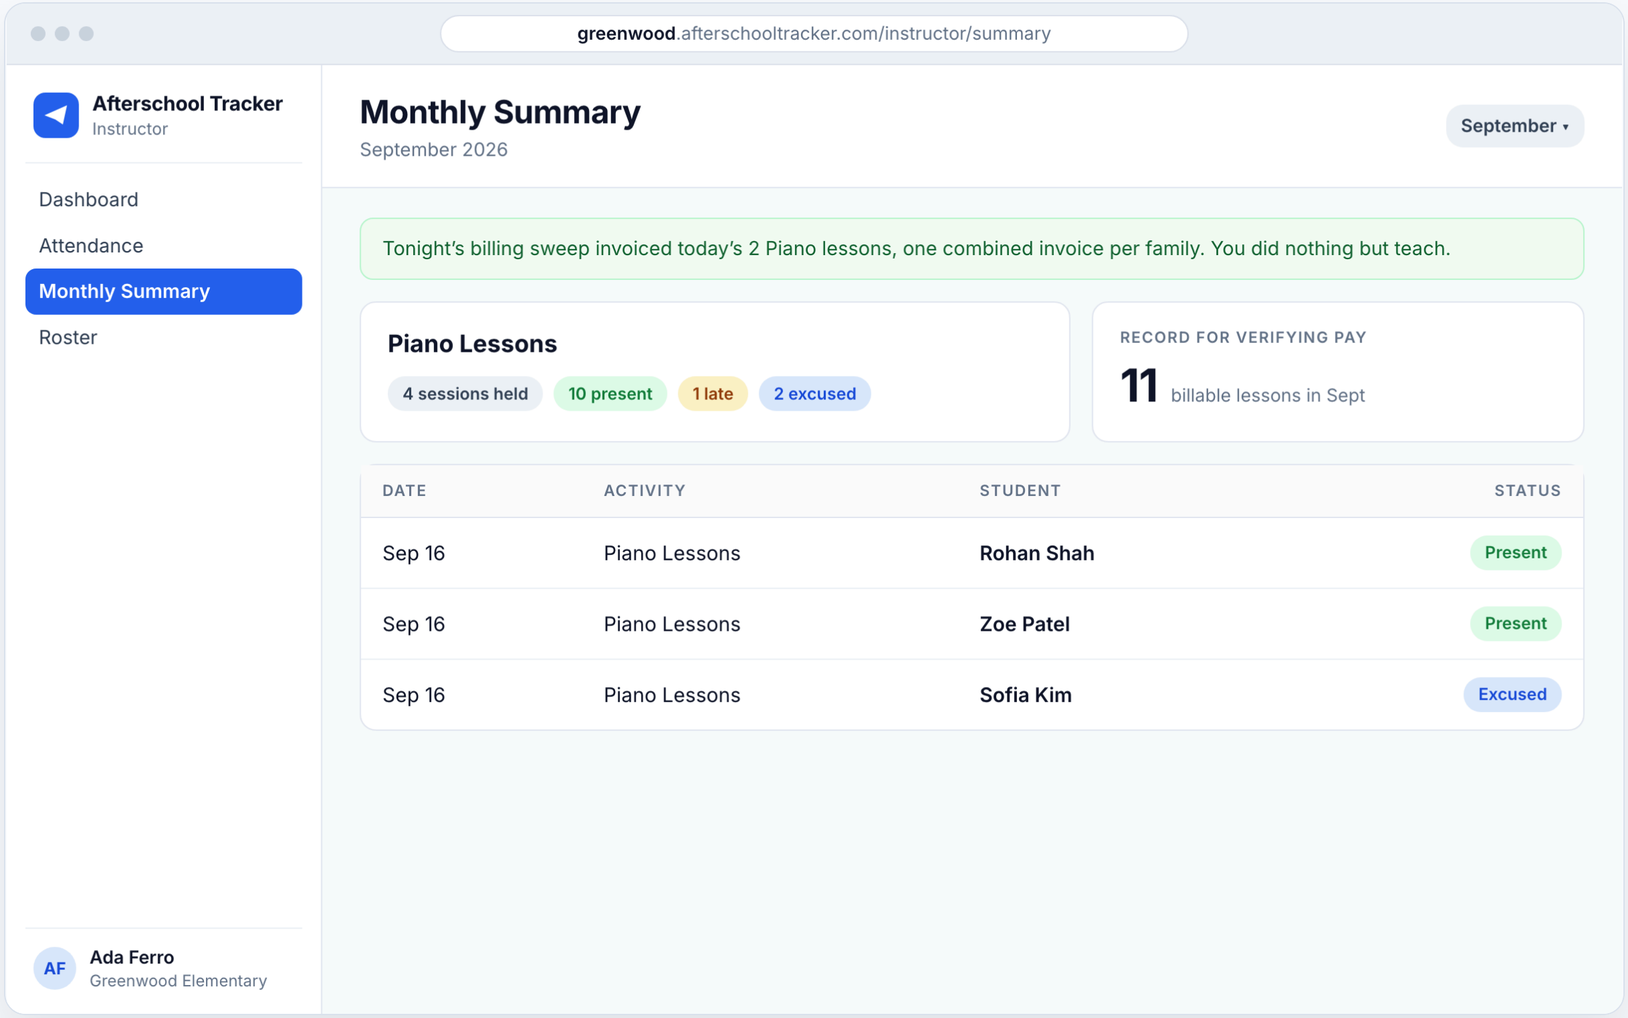
Present, Late and an unexcused Absent create a charge. Sofia's family gave notice, so she is Excused and not billed. No manual invoicing, ever.



INSTRUCTOR · 2 OF 2

A record for verifying pay

No dollar amounts here; this is the attendance record instructors use to verify pay. The business office runs payroll from the matching report.



06

HAT 6 OF 6

The Business Office

Task: close the month, cleanly

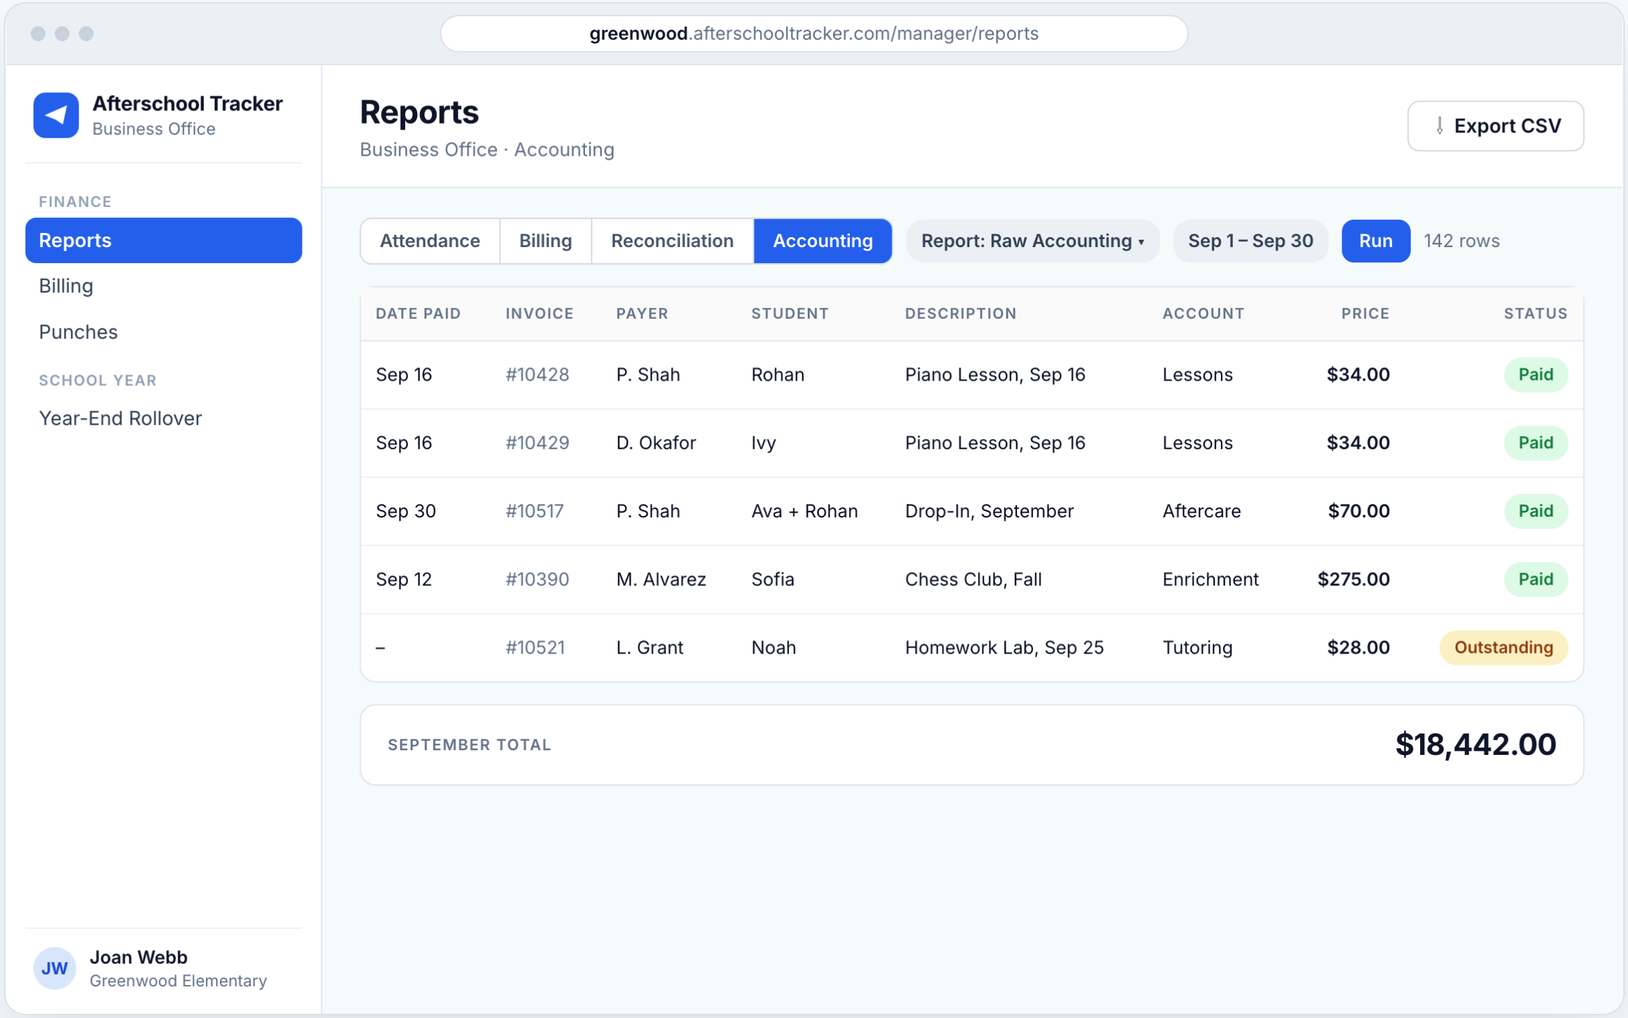
1. Run the accounting reports and reconcile last month’s activity
2. Pull summary reports by program to inform payroll
3. Issue a credit or refund for any erroneous charge
4. Export to CSV for the books

Audit-ready: reconcile Stripe payouts against billed activity in minutes, with clean separation of duties.

BUSINESS OFFICE · 1 OF 3

Close the month

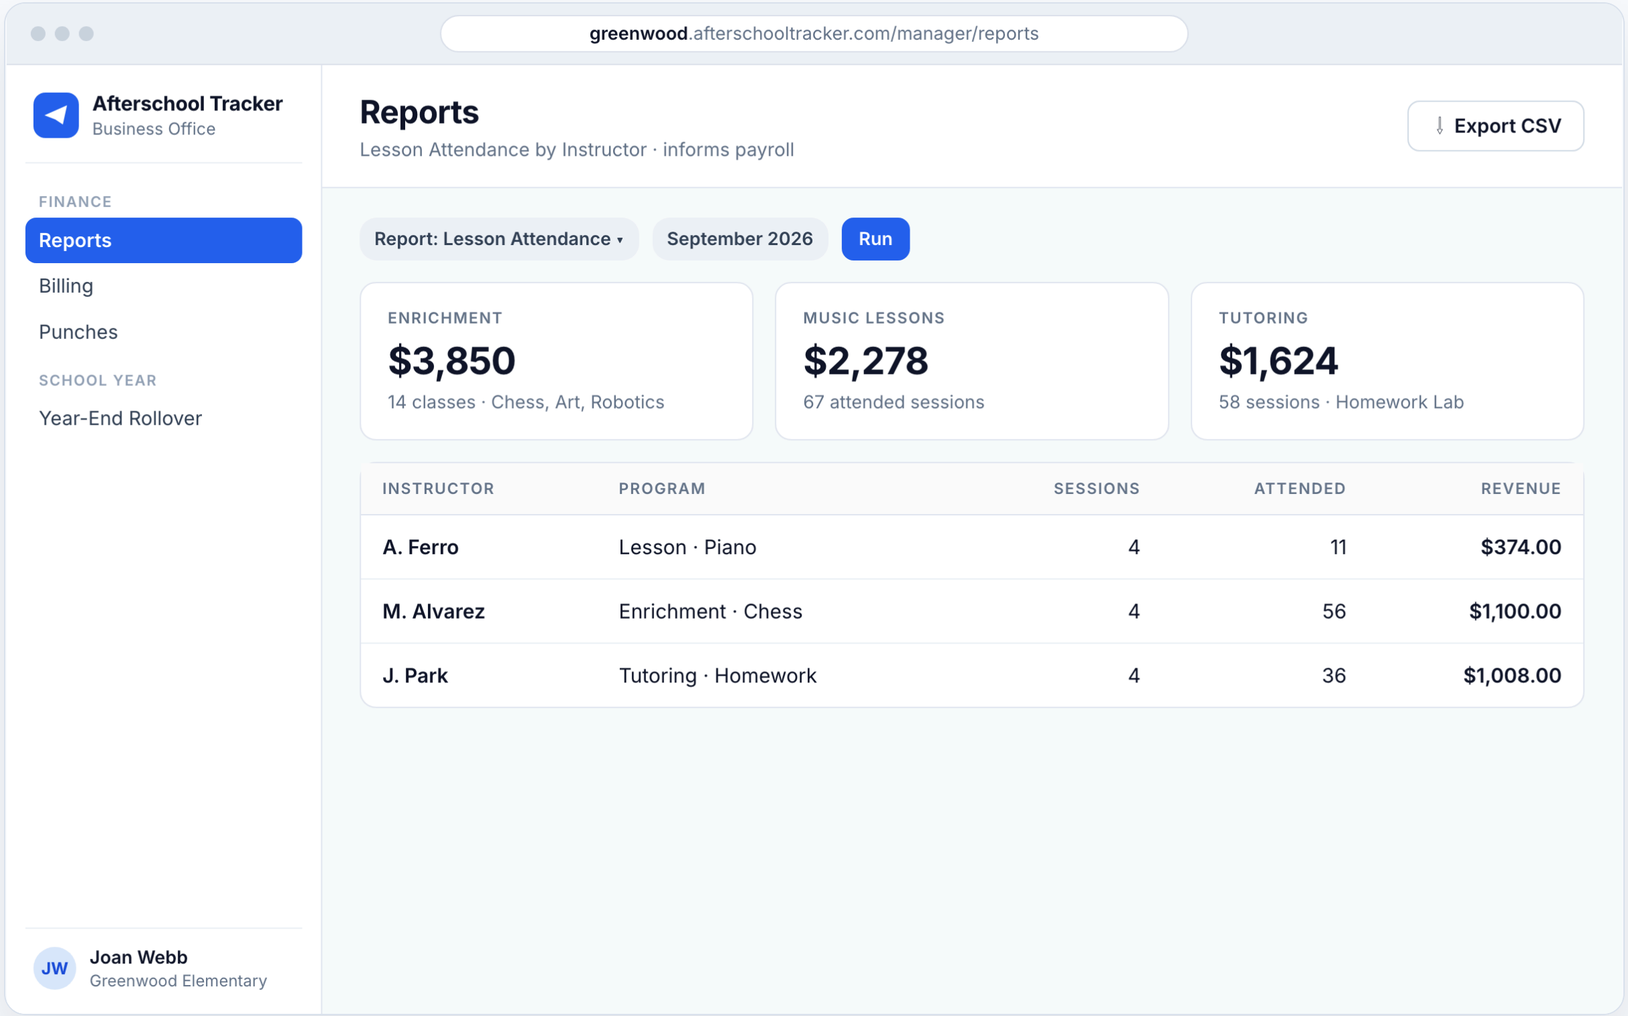
14 accounting reports (Raw Accounting, Settlement, Aging, Deposit History), all campus-scoped, no Stripe login. One CSV closes the month.



BUSINESS OFFICE · 2 OF 3

Figures for payroll

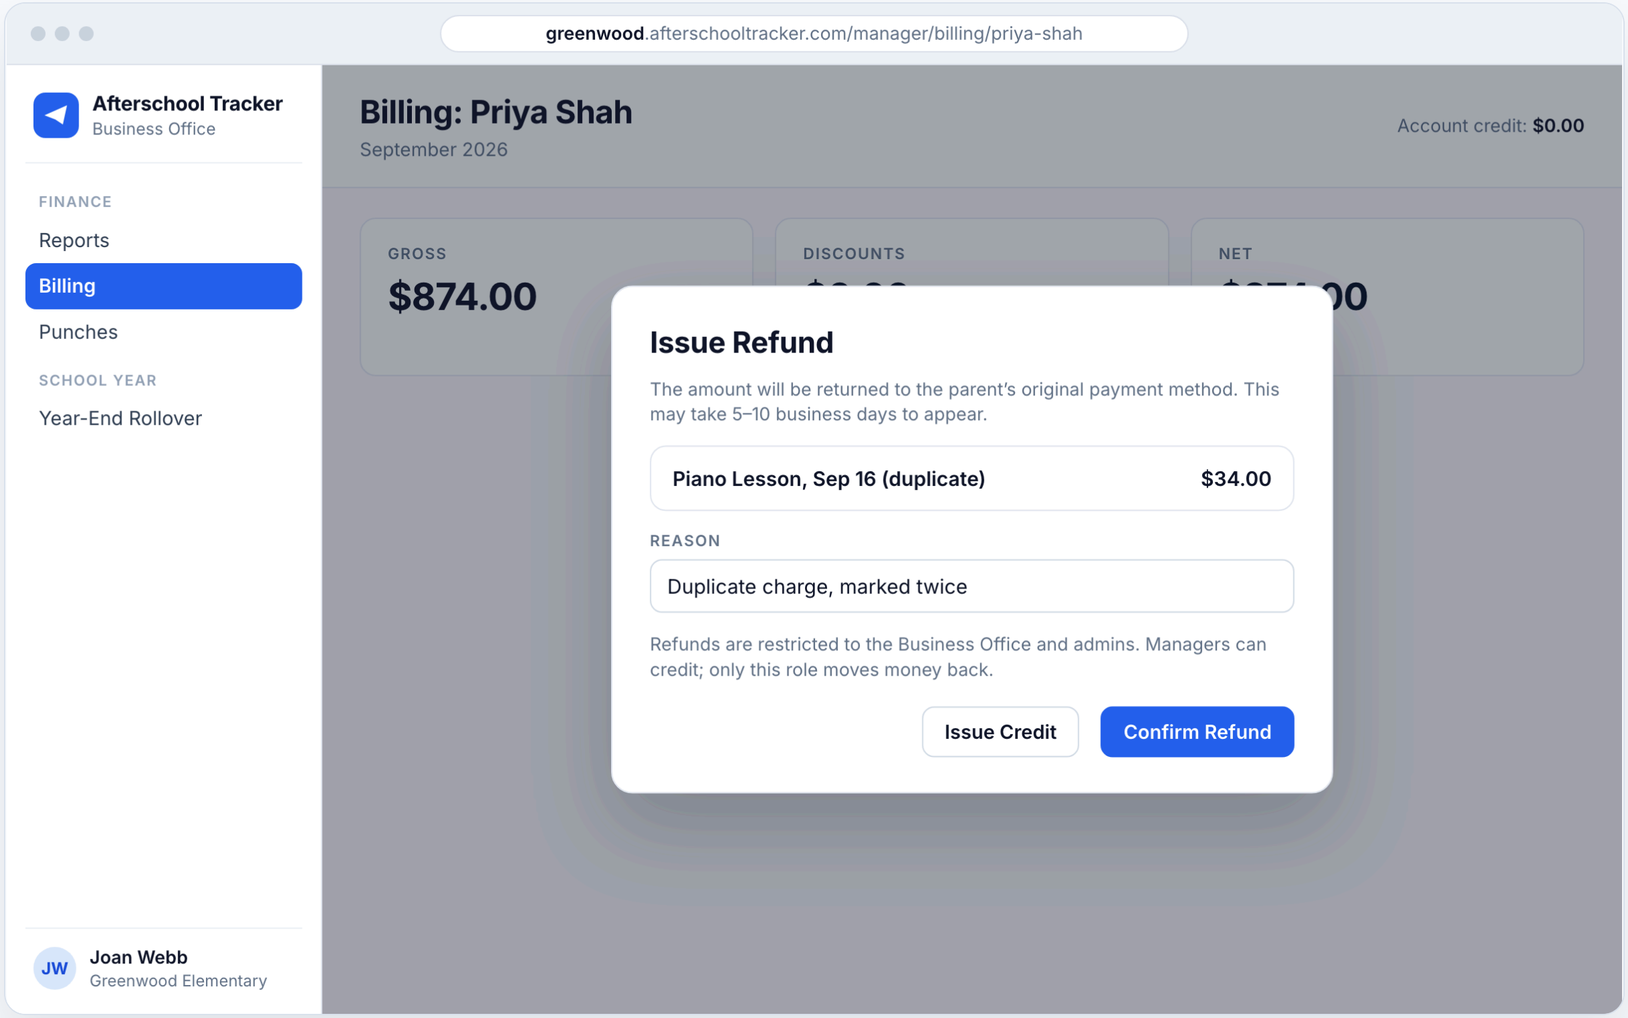
Revenue split by program and instructor, the exact figures the office needs to pay instructors and reconcile against each instructor’s monthly summary.



BUSINESS OFFICE · 3 OF 3

Credit or refund

A credit stays on the account (no money moves, auto-applies next invoice). A refund returns money, and only the business office can do it.



WHAT A DIRECTOR JUST SAW

Six hats. One streamlined workflow.

MANAGER

Copied last year’s Fall season forward in a click, then adjusted rates and instructors.

A week of setup becomes a few minutes.

PARENT

Two kids, three programs, one saved bank account and transparent all-in prices.

Cheaper and simpler than any competitor.

STAFF

Real-time “who’s on campus” and accountable sign-out.

Calmer dismissal, real safety.

STUDENT

Tapped their name, saw their afternoon.

Independent for kids, instant for staff.

INSTRUCTOR

Marked attendance; billing ran overnight.

They just teach.

BUSINESS OFFICE

Reconciled the month, ran payroll reports, refunded one error.

Audit-ready books, clean roles.

Afterschool Tracker
AFTERSCHOOL PROGRAM MANAGEMENT

Give your program its afternoons back.

Time back to schools. Real savings for parents. Safety and clean books you can trust.
One tool, from the first season to the last reconciliation.

Book a walkthrough for your school www.afterschooltracker.com

FERPA-aligned and built security-first on hardened, best-in-class platforms, with payments secured by Stripe. Each school gets its own branded site. California and New York today, more states soon.
